Fizzve V0 6 Lite.rar Reply. Oct 14,
2019. The invention relates to the field
of electrical power supplies such as,
for example, power supplies for power
tools. More specifically, the invention
relates to connecting devices for
connecting an electrical power supply
to a power cord. Generally, a power
supply for an electrical power tool
comprises a housing. The housing is
connected to a power supply cord. The
power supply cord is used to supply
power to the power tool. The housing
is provided with electrical contacts to
connect the power supply cord to the

electrical power supply. In some designs of known power supplies, the power supply cord is attached to the housing by a cord connector. The cord connector comprises a complementary connector. The complementary connector comprises a housing portion for connection to the housing and a first longitudinal direction portion for connection to the power supply cord. Generally, the housing portion and the first longitudinal direction portion are formed as a single integral piece. To connect the complementary connector to the housing, the complementary connector is connected to a first end of

the housing by, for example, screwing. In some designs of known power supplies, the power supply cord is attached to the housing by a cord connector. The cord connector comprises a complementary connector. The complementary connector comprises a first longitudinal direction portion for connection to the power supply cord. Generally, the first longitudinal direction portion is formed as a single integral piece with the housing. To connect the complementary connector to the housing, the complementary connector is connected to a first end of the

housing by, for example, screwing. In other designs of known power supplies, the power supply cord is attached to the housing by a screw connector. The screw connector comprises a housing portion for connection to the housing and a first screw portion for connection to the power supply cord. Generally, the housing portion and the first screw portion are formed as a single integral piece. To connect the screw connector to the housing, the screw connector is connected to a first end of the housing by, for example, screwing. In other designs of known power supplies, the

power supply cord is attached to the housing by a cord connector. The cord connector comprises a housing portion for connection to the housing and a second longitudinal direction portion for connection to the power supply cord. Generally, the housing portion and the second longitudinal direction portion are formed as a single integral piece. To connect the cord connector to the housing, the f678ea9f9e
